

Fibotype

Features:

- high current drivers
- high speed
- wide choice of laserdiodes
- custom package
- optics and fiber-arrays optional

MM-Fiber Coupled Laserdiode Subsystems

Fibercoupled laserdiodes are widely used in many industrial applications such as the printing industry, other graphic arts, material processing and sensing instruments.

Laserdiodes need safe drive conditions guaranteed by ready-to-use laserdiode subsystems. These products are cost savers for the customers dealing with industrial environment or growing complexity of the final system. Fibotec offers subsystems that provide fast modulation of high-current laserdiodes with fiber arrays attached.

Laserdiodes to be integrated to a subsystem are used according to the customer's need from a variety of different suppliers or specified by the final customer to address certain purchasing agreements or qualification processes.
